

## Supervised Topic Models

Advanced Machine Learning for NLP

Jordan Boyd-Graber

PROJECTS AND HINTS

## Projects

---

- Project proposals due March 20
- Post on Piazza
- At most three people on a team
- Must have ML + NLP

## Math Treatment

---

- Good so far
- Make sure you give intuitions
- Connect to other stuff!
- Particularly previous weeks

## Demonstrations

---

- Make sure all information is available
- Provide framework if computation is hairy
- Make numbers friendly if you can
- Make sure to show off fundamental attributes
- Fine to keep it simple or focus on specifics
